

# BODE Eurodispenser 3000

## Properties

The BODE Eurodispenser 3000 is a simple and practical application aid for the hygienic application of wash lotions and skin care preparations as well as for the application of hand disinfectants in limited spaces.

The dispenser allows a fast and straightforward insertion of 350/500 ml BODE bottles.

Advantages at a glance:

- made of solid, sturdy plastic
- simple handling and cleaning/disinfection
- mountable even with limited space
- delivery incl. mounting parts, instruction sheet, manual and dosing pump
- special replacement pump for Eurodispenser 3000 available

## Set-up

The system consists of two parts:

- rear plastic panel with two drilled holes
- dosing pump for liquid products

## Material

The BODE Eurodispenser 3000 is made of robust, sturdy plastic.

Characteristics:

- good UV and alcohol resistance
- tested for food conformity
- rear panel and dosing pump not autoclavable
- rear panel and material cover made of Bayblend (Mix of PC (Polycarbonate) and ABS (Acrylonitrile butadiene styrene))
- pipe made of PP (Polypropylene) and PE (Polyethylene). Pump cylinder and pump piston made of PP.
- pump outlet made of HD-PE (High density Polyethylene). Ball made of borosilicate glass.
