Toilet brush holder "NIMBUS series"

Dimensions: $\pm 3\%$

TECHNICAL DATASHEET

COMPONENTS AND MATERIALS

- Rear wall plate – AISI 304 stainless steel. Secured to wall with two screws.
- Main body – AISI 304 stainless steel, matt black powder coat (RAL 9004), 115 μm thickness. The main body contains the housing cup for the brush and the bracket for holding the rear plate
- Brush set made up of the brush, the round lid and the two threaded semi-shafts forming the handle. The handle and the lid are made of stainless steel with matt black epoxy coating (RAL 9004). The brush is made of thermoplastic material.
- Fixings set - Two $\varnothing 6\text{mm}$ wall plugs, two $\varnothing 4\text{mm}$ screws

OPERATION

Suitable for hotel or residential bathrooms. No specific operation instructions.

MOUNTING

Secure the anchor plate by drilling two holes in the wall to place the plugs (6 mm) and screws (4 mm) at the points indicated in the sketch. Once the anchor plate is fixed, slide the main body against the rear plate ensuring that both are coupled.

ARCHITECTURAL SPECIFICATION

Genwec toilet brush holder "Nimbus series" shall be 1,5mm thickness, AISI 304 stainless steel. Shall be RAL 9004 matt black powder coated with a thickness of 115 μm . The main body contains the housing cup for the brush and the bracket for holding the rear plate. The brush assembly is made up of the brush, the threaded semi-shafts of the handle and the lid closing the bowl.
