

Technical product information

calgodip Blue Kamille Film

Film forming teat dip- and care agent

Product benefits

- Europe-wide authorization
- ensures udder health and milk quality
- gives excellent skin condition and protection
- forms long lasting barrier film
- iodine-free

General Description

calgodip Blue Kamille Film is a ready-to-use teat care preparation of the new generation for dipping after each milking. calgodip Blue Kamille Film forms a non dripping barrier film around the teat which protects the udder against invasion of bacteria. calgodip Blue Kamille Film contains skin protecting components and a well balanced amount of biological lactic acid, which is characterized as especially skin friendly and has simultaneously a remarkable disinfection performance. High quality care components make the skin resistant and supple. calgodip Blue Kamille Film was tested according european norm to EN 1656. The contained camomile soothes and cares the skin. The tea-tree oil has low odor acceptance by flies, thus they will not settle on the teats after milking and dipping.

Application

Apply as concentrate immediately after each milking using proper dip beaker.

Detailed data on the efficacy of the product are available in a separate microbiological product information.

Technical Data
