

Technical product information

tru-lit C-18 Carpet

Carpet Shampoo

Product benefits

- excellent cleaning performance
- solid foam
- pH neutral
- leaves a pleasant scent

General Description

tru-lit C-18 Carpet is a concentrated carpet shampoo for the cleaning of textile floor coverings like rug and carpets and for upholstery. The product contains a specific mixture of surfactants that forms a strong and dry foam that dissolves dirt and grease to provide an excellent cleaning performance.

tru-lit C-18 Carpet is formulated without bleaching ingredient nor optical brightener.

Due to the neutral pH, tru-lit C-18 Carpet is particularly gentle on fabrics and leaves a pleasant scent after application. The product can be easily removed with a wet-dry vacuum cleaner.

tru-lit C-18 Carpet is suitable for all foam cleaning methods.

Application

Thoroughly vacuum the carpet and remove the stains. Turn off the underfloor heating.

Recommended use concentrations:

- **For Manual Application:** up to 5% (0,5 L / 10 L water). Work the liquid into a foam and clean with foam only.
- **For single-disc machine with shampooing brush:** Fill a 5% - 10% (500 - 1000 mL / 10 L water) solution into the machine tank and run the carpet with single-disc machine and shampooing brush.
- **For yarn pad method:** Spray a 5% (0,5 L / 10 L water) solution on the carpet and yarn pad. Work the area in overlapping paths from the single-disc machine. Vacuum after cleaning.
- **For carpet shampooing machine:** dose a 2% - 3% (200 - 300 mL / 10 L water) solution into the water tank of a shampooing machine and shampoo. Wet vacuum the carpet and raise the pile with a pile brush to shorten the drying time. Let the carpet dry, then vacuum the crystallized shampoo residues.
- **For spray extraction:** Spray a 2% - 5% (200 - 500 mL / 10 L water) solution on the textiles and rinse/extract with water. When needed, add a defoamer.

In case of highly soiling, the surface can be soaked with the application solution for 5 - 20 minutes before the start of the cleaning.

Material Compatibility

It is recommended to check fabric compatibility on a hidden section of the textile.
