

# Technical product information

# calgodip Amadine Film

## Film forming teat dip- and care agent

### Product benefits

- Europe-wide authorization
- ensures udder health and milk quality
- gives excellent skin condition and protection
- forms a long lasting barrier film
- iodine-free

### General Description

calgodip Amadine Film is a ready-to-use teat care preparation of the new generation for dipping after each milking.

calgodip Amadine Film forms a non dripping barrier film around the teat which protects the udder against invasion of bacteria.

calgodip Amadine Film contains skin protecting components and a well balanced amount of biological lactic acid, which is characterized as especially skin friendly and has simultaneously a remarkable disinfection performance. High quality care components make the skin resistant and supple.

calgodip Amadine Film was tested according european norm to EN 1656.

### Application

Apply as a concentrate immediately after each milking using proper dip beaker.

Detailed data on the efficacy of the product are available in a separate microbiological product information.

### Technical Data
