

Microbiological drain care

Product benefits

- eliminates unpleasant odors
- keeps the drain clear
- protects pipes preventively
- economical in use

General Description

calgoKnight bioSanity protect is an environmentally friendly drain care product based on microorganisms. The product can be used for all kitchen, bathroom and floor drains. When used regularly, microorganisms colonize the inner pipe wall and break down odorous substances and deposits, helping to prevent blockages in drains and pipes in the long term.

Application

- Shake bottle or canister before use.
- Pour 50-100 ml of calgoKnight bioSanity protect into the drain or toilet.
- Then add 100 ml of tap water.
- Leave to work for at least 3 hours or overnight.

The product should not be used at the same time or short time before other cleaners, as these can damage the microorganisms. For large kitchens use daily after work, for households - once or twice a week.

Material Compatibility

Compatible with all common pipe materials.

Technical Data

Appearance	cloudy, brown liquid
Density (g/cm ³)	1,01
pH-value (conc.)	3,3
Storage	10°C - 25°C

Ingredients active microbial cultures in a nutrient solution, non-ionic surfactants < 5%
