

Microbiological bathroom cleaner

Product benefits

- natural cleaning of all bathroom surfaces
- removes dirt and odors
- strong against limescale and deposits
- economical in use

General Description

calgoKnight microClean bath is a natural cleaner with limescale-dissolving properties based on microorganisms, plant-derived surfactants and organic acids. It is suitable for all wipeable surfaces in the sanitary area, such as ceramic, tiles, plastic and glass. The microorganisms enhance the cleaning effect of the other ingredients and prevent the spread of harmful bacteria, thereby maintaining a long-lasting freshness in the bathroom. This product does not contain any genetically modified microorganisms and is free from alcohols, chlorine and microplastics.

Application

- Shake bottle or canister before use.
- Spray application: 40-100 ml / per 1 L of lukewarm water
- Manual cleaning: 50-100 ml / per 10 L bucket of lukewarm water
- Glass cleaning: 20 ml / per 1 L of water
- Use up the ready-made solution within 2-3 days.
- For heavy soiling, apply pure, leave to work for 10-15 minutes and rinse with water.

Material Compatibility

calgoKnight microClean bath can be used on all common acid-resistant materials in the sanitary area.

Technical Data
