

Ecological sanitary cleaner

Product benefits

- EU-Ecolabel certified
- based on citric and lactic acid
- effective against limestone, soil and soap residues
- effectiveness confirmed by external test laboratory

General Description

tru-lit ECO Bath is an effective acidic cleaner for all sanitary surfaces that fulfils the environmental criteria for the award of the EU-Ecolabel. The product is suitable for daily use and is effective against limescale deposits, soap residues, grease and cosmetic residues.

tru-lit ECO Bath cleans gently and leaves a pleasant, fresh scent.

Application

Dosage:

Normal to heavy soiling: undiluted

Light soiling: 5%

Rinse thoroughly with tap water after cleaning.

By following the dosing instructions, you will help reduce water pollution and water and energy consumption.

Material Compatibility

tru-lit ECO Bath can be applied to all common acid-resistant surfaces.
