

Caustic detergent sanitizer with active chlorine

Product benefits

- DLG approved
- phosphate free
- non foaming
- excellent disinfecting action

General Description

calgonit TA is a caustic, liquid cleaner with active chlorine for combined cleaning and disinfection of tube milking machines, milking equipment, cooling and collecting tanks.

calgonit TA does not foam, contains a very effective hardness stabiliser and is therefore suitable for all water conditions.

Application

Concentration: 0.5 - 0,7% (5-7 g/l), 10 to 20 minutes

Temperature: 40 - 80°C

Rinse thoroughly with tap water.

Material Compatibility

Stainless steel is not affected by the solution. Aluminium is slightly etched.

Technical Data

Appearance	clear, yellowish liquid
Odour	slightly like chlorine
Active chlorine (%)	3,8
Density (g/cm ³)	1,18
p-Value (1%)	2,2
Storage	-10°C - 35°C

Handling references

Keep container closed. Store cool and protect from sunlight (reduction of chlorine). Do not mix with other detergents.

Use biocides safely. Always read the label and product information before use .
